

Cognizant ESG Scope 3 scenario planning solution

Problem statement

Today's businesses are striving for a net zero future, envisioning a world with zero emissions, zero waste and zero inequality that will enhance people's lives—while placing sustainability at the forefront. Businesses must incorporate operational, experiential and financial data insights to drive sustainability on a larger scale, not only for themselves but across their supply chain ecosystems. All organizations with significant upstream procurement will need to improve management, tracking and reporting of their suppliers' emission footprint.

Solution

Cognizant's ESG Scope 3 scenario planning solution establishes a strategic tool for organizations by integrating procurement and sustainability data. This integrated approach in ESG (Environmental, Social and Governance) Scope 3 data management enables automated, seamless analysis and monitoring of sustainability performance while reducing carbon footprint. The solution focuses on extended "what if" scenario planning and reporting upstream footprint to optimize activities and enhance visibility of sustainability and business drivers.

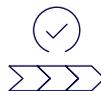

Features

- Increased carbon tracking by products and vendors.
- Carbon emission and spend management analysis.
- Real-time Scope 3 data analysis and monitoring.
- System-driven Scope 3 carbon footprint and spend management planning.
- Scope 3 target carbon footprint and target spend-based scenario planning.
- Scope 3 variance and trend analysis.

Benefits

Reduced carbon emission footprint

Optimized scenario planning, cost/benefit analysis for compliant supply chain

Scope 3 vendor management and KPI tracking
