# Multicloud Migration Solutions and Services from Cognizant® and Oracle

Accelerate and simplify your move to Oracle Cloud

Cloud modernization is a long journey, but you don't have to navigate it alone. Hyperscalers like Oracle Cloud Infrastructure (OCI) offer powerful multicloud platforms, and Cognizant brings the expertise to make your journey seamless.

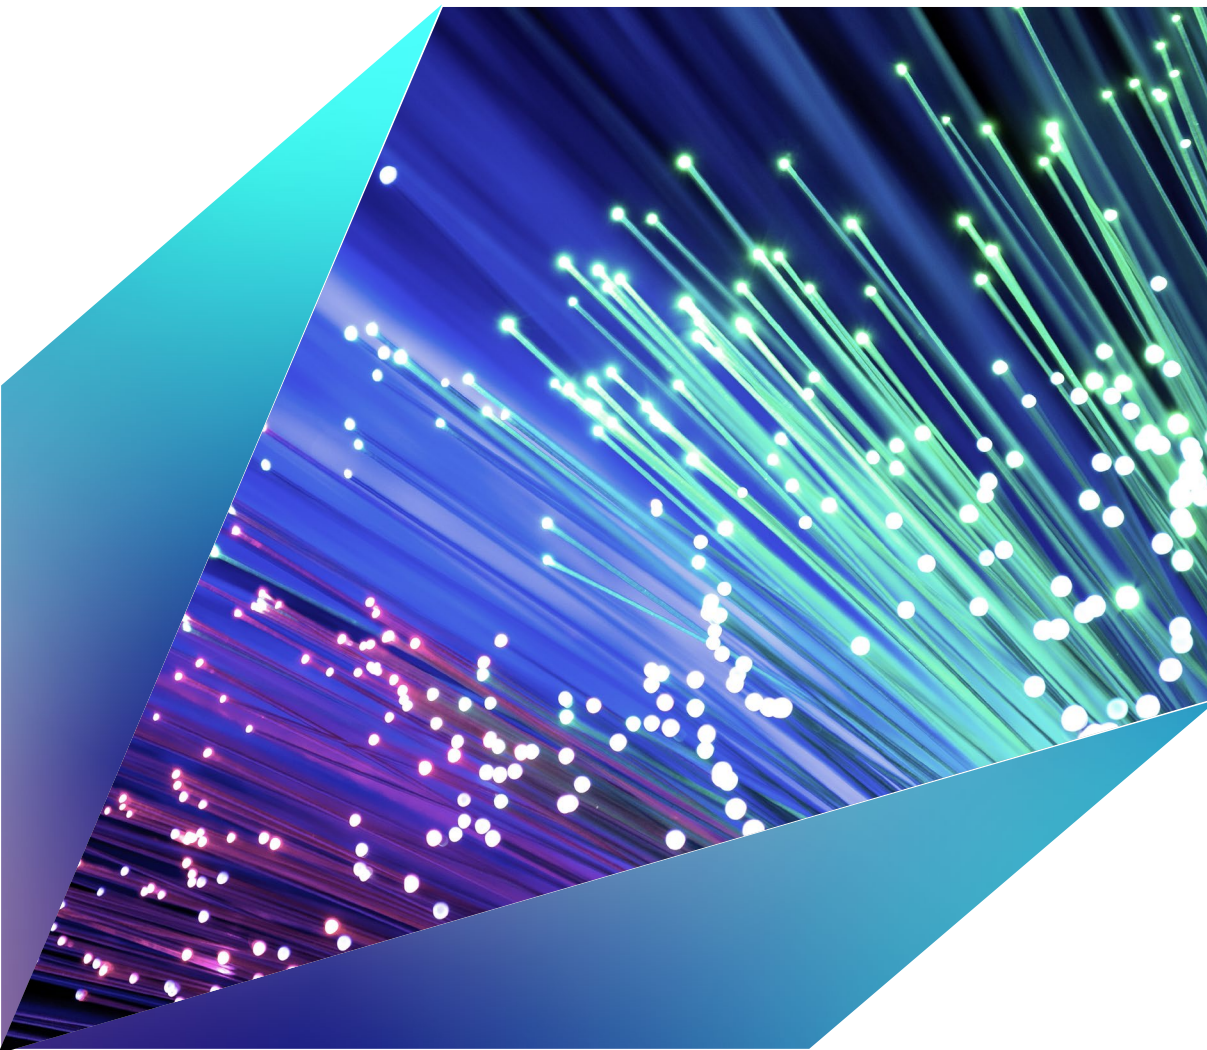

With deep experience in both OCI and multicloud environments, Cognizant delivers tailored, end-to-end services—from discovery and strategy to migration and ongoing optimization.

# Navigate multicloud challenges with confidence

Modernizing Oracle workloads can present a range of challenges. Migration complexity, including compatibility and seamless integration can slow your progress. And the lack of a data strategy can add further obstacles, especially if you're pursuing an AI strategy with your cloud modernization. Meanwhile, high on-prem costs and hardware refresh cycles can keep you locked into expensive CapEx models.

Moreover, your business needs to ensure high performance, availability, and continuity—especially for critical applications using Oracle Exadata and **Oracle RAC**. Security and compliance requirements only add to the pressure. Overcoming these barriers is essential for a smooth, cost-effective, and future-ready Oracle database workload Cloud migration.

Cognizant helps you simplify the journey.

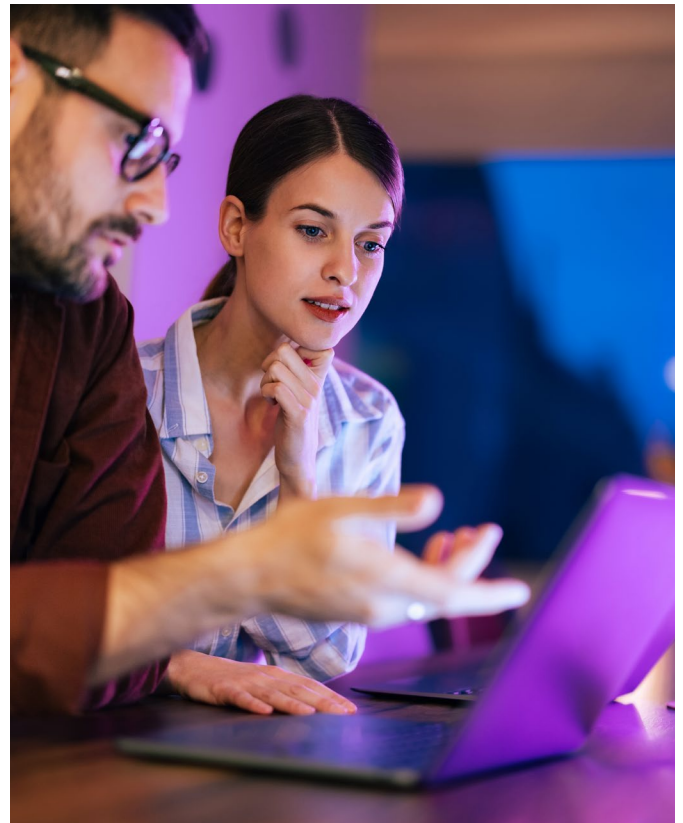

# Your Oracle Cloud journey, mapped and managed

As a trusted Oracle Cloud Solutions Provider (CSPE) and certified partner across major hyperscalers, Cognizant can help you to rapidly modernize, manage and migrate with confidence.

## Oracle Database@x strategy and consulting

Cognizant's CloudFit assessment services define your enterprise cloud architecture and capacity for performance and resilience. Our team will assess your business's cloud readiness and formulate tailored migration roadmaps for single, multi, or hybrid cloud environments. Our advisory services include cloud discovery, bill of materials, database modernization paths and enablement of Exadata on Choice of Hyperscaler, Oracle Autonomous Database and Oracle Database 23ai with AI/ML capabilities. Whether we're designing a new strategy for you, optimizing infrastructure, or migrating to any hyperscaler of choice, we bring deep industry expertise and best practices.

## Cost optimization & DB migration

We'll guide you in architecting and deploying Database High Availability solution including Real Application Cluster and Exadata infrastructure, to maximizing multicloud value, through the Oracle Database@x Solution. Our services align with Oracle's Exadata Cloud@Customer and OCI Dedicated Regions for on-prem needs. Our Database migration services Powered by Cognizant's One-Click DB Suite, we deliver 25% automation in Oracle Database upgrades, migrations, and modernization. Our solution helps organizations migrate databases using a factory model approach, significantly reducing project timelines and achieving cloud benefits earlier than expected. Additionally, data security on the cloud is enhanced using various DB native advanced security products and ransomware protection for databases. These features are enabled on Hyperscaler through Oracle Database@X deployment and the backup solution using ZDLRA.

## Next-gen innovations & AMS

Our managed services continuously monitor and optimize your Cloud environments using AI/ML and automated tools. As an Oracle CSPE partner, we support the full stack under unified SaaS-like SLAs - from infrastructure to applications. We'll help you by ensuring risk mitigation, security, resilience, and regulatory compliance, providing you with 24/7 support and a year-on-year improvement strategy. Our ITSM framework gives you proactive issue resolution, workload automation and measurable performance enhancements. The Cognizant One Click View tool enables customers to monitor Oracle Database@X usage and consumption in real-time and analyze various parameters. This tool helps make data-driven, informed decisions to optimize cloud consumption and reduce costs by 12% to 18%.

## Unlocking multiple benefits for your business

Cognizant's MultiCloud Database Migration services can help you advance adoption, boost innovation, improve operational efficiency by 30%, and reduce costs for intensive applications by up to 25%. This solution offers various benefits for deploying Oracle databases to any Hyperscaler, such as Azure, AWS, and GCP. Some of the key benefits include:

- Fully compliant, high-availability architecture with 100% redundancy (DB, storage, network)
- High-performance Exadata platform with protection from node failure
- License compatibility with on-prem BYOL support for Azure, AWS, GCP
- No additional license costs for a 25–30% total cost reduction
- 99.999% application availability and 30–70% performance improvement
- Increased agility, robust data security, and sustainability benefits
- Oracle support rewards up to 25% of cloud consumption
- Elastic cloud resources to control costs

# What makes Cognizant different?

We combine proven tools, expert services and a customer-first approach to make your Oracle migration faster, safer and more cost-effective.

## Tailored cloud strategy

Addresses both your business and technology challenges with customized solutions for smooth cloud transitions.

## Top-tier partnerships

We are a trusted partner of Oracle, Microsoft, AWS, and GCP – so you get best-in-class support and resources.

## End-to-end services

We cover your full migration journey - assessment, planning, migration, and post-move optimization.

## Deep Migration Expertise

Proven success in Hyperscaler and OCI migrations, including Oracle Exadata and Oracle RAC.

## Oracle license optimization

Helps reduce costs and maximize value from existing Oracle investments.

## Global leadership

We're ranked top 3 globally for Oracle Cloud, with the highest number of OCI certifications.

## Gen AI capabilities

Our tools like Ora0 (LLM on OCI) and co-pilot bots streamline your delivery and user experience.

## AI/ML-driven platforms

Use of Cognizant's Intelligent Enterprise Platform and iCMP for monitoring, provisioning, and cost control.

## TCO analysis & business case

Builds strong financial justification for cloud migration. Helps to reduce overall TCO up to 20% – 25%

## Robust architecture

Aligns with Oracle Maximum Availability Architecture and hyperscaler best practices for performance and availability.

## Security built-In

Embedded data protection throughout the migration lifecycle.

## Zero-cost migration

Removes barriers to entry with no upfront migration costs.

## Proprietary tools

- 1-Click DB Migration: Speeds up and simplifies database transitions.
- 1-Click View: Offers real-time migration visibility and control.

# Why do businesses choose Cognizant?

## A wealth of Oracle experience

With over 25 years of Oracle experience and global multicloud capabilities, we're a trusted partner for modernizing enterprise workloads.

Long-standing Oracle partnership and CSPE-certified teams.

500+ Oracle Cloud projects delivered in 75+ countries.

Strategic alliances with Oracle, AWS, Azure and Google Cloud.

Multiple Oracle Partner Awards in 2024.

Expertise across infrastructure, data and applications.

## From banking to retail, results that resonate

Clients worldwide rely on Cognizant for scalable, agile solutions that unlock the full value of the cloud, minimizing disruption and maximizing long-term impact.

- For a **leading bank**, we assessed 400+ on-prem apps and 1,200+ Oracle databases for Oracle Database@Azure, ensuring security, compliance, and performance.
- For a leading healthcare company in the US, we migrated large-sized databases to Oracle Database@Azure, ensuring resilience, scalability, and enhanced performance on the Azure Cloud.
- A **top telecom provider** migrated 300+ databases and 80+ apps to Exadata Cloud@Customer, cutting TCO by 40% and boosting performance by 20%.
- A **global fast-food chain** transitioned to OCI, halving infrastructure spend and achieving 2x-60x UI performance gains.
- A **life insurance company** moved 75% of its IT to OCI, cutting CapEx/OpEx by 25% and avoiding \$20M in licensing costs.
- A **leading equipment manufacturer** achieved 10x performance, 30% CapEx reduction, and 20% better system performance post-OCI migration.
- The **largest integrated food company in the Middle East** automated processes via OCI, reducing turnaround by 70% and costs by 15%.
- A **surgical device manufacturer** improved governance, accelerated inventory processing by 30%, and enhanced response time by 20%.

# Ready to take the next step?

Cognizant brings clarity, control and confidence to your MultiCloud journey for Oracle Database workloads. We'll help you design a modern Cloud foundation that fits your business today and grows with you tomorrow.
