

# Unlock your data with Cognizant® and Oracle Fusion Data Intelligence

36%

of organizations say lack of visibility is a key challenge in optimizing their cloud infrastructure.

As organizations embrace multicloud strategies, data can become increasingly distributed, siloed and difficult to trust.

Siloed data and apps

Overreliance on desktop visualization tools

Fragmented departmental BI tools

Limited AI/ML capabilities

Legacy platforms can't support emerging tech

## Analyze across Clouds and act with confidence

Access to consistent, trusted data means faster, more informed decisions and earlier AI-adoption.

### One platform, total clarity

Access to consistent, trusted data means faster, more informed decisions and earlier AI-adoption.

No manual extraction

Real-time pipelines

Native support

Semantic layer

## Unify, enrich and trust your data

Build a 360° business view by blending application data with third-party datasets.

Prebuilt models & dashboards (HCM, ERP, CX)

Enhanced KPI tracking

Contextual data views

Governance controls & role-based access

## AI for everyone, insights for everything

Oracle Fusion Data Intelligence democratizes intelligence with its embedded machine learning and GenAI-ready capabilities.

Predictive analytics

for planning, forecasting and optimization

Natural language queries

and GenAI prompts for non-technical users

Embedded AI

recommendations surface insights you didn't know to look for

Training data and model outputs

governed for compliance and trust

## Real world fix

We helped a residential security provider cut manual data handling and speed up decision-making by migrating from legacy Oracle BI Apps to the next-gen Oracle Fusion Data Intelligence cloud platform.

## The outcomes

50%

reduction in manual data handling

30%

faster decision-making

4x

improvement in business trend visibility

Empowered reporting users

to build reports and visualizations independently

Enabled downstream teams

to integrate and leverage data cross the enterprise

Scalable data architecture

with prebuilt HCM Cloud reports and cross-functional reporting capabilities (e.g. ERP, SCM)

## Why Cognizant?

With a 25-year Oracle partnership and over four Oracle Partner Awards in 2024, Cognizant can offer you Oracle cloud experience and multicloud delivery at scale.

- Top three global provider of Oracle-certified cloud professionals
- Global System Integrator (GSI) featured partner
- 500+ Oracle cloud transformations across industries
- Expertise across Oracle Cloud Infrastructure, AWS, Azure, GCP and hybrid Cloud

If you're working with Oracle solutions across multiple clouds and trying to achieve more consistent, trusted insights, Cognizant can help. [Visit Cognizant.com](https://www.cognizant.com)
