Meeting interoperability data requirements to deliver on-demand access

Complying with federal interoperability requirements is a complex undertaking that needs a strategic approach. Done right, your interoperability investment today can become an asset that extends your existing IT infrastructure to enable secure, on-demand data access and position your organization for future growth.

The TriZetto® Connected Interoperability Solution includes modular software-as-a-service (SaaS) products that allow members to access health data from payer core systems on-demand securely. It was designed and developed to be paired with advisory, utilization and enablement services to deliver critical interoperability capabilities.

Data standardization and translation
To empower members with on-demand healthcare information, payers must provide secure access to standardized clinical and administrative data from within their core systems. For payers using the

TriZetto® Facets® and TriZetto® QNXT™ platforms, the TriZetto Interoperability Adapter:

- Integrates data and converts it to the HL7® FHIR® standard in real time for use when responding to an interoperability request or for ingestion into data lakes and data warehouses
- Comes pre-integrated with the Facets Open Access and QNXT QXI platforms
- Upon request, receives data from core systems via web services and formats data into the HL7 FHIR Standard Version 4.0.1 through the native API in real time
- Supports terminology normalization by transitioning necessary data content to industry standards, including the United States Core Data for Interoperability (USCDI) February 2020 Version 1 and HL7 FHIR Standard Version 4.0.1
- Includes scalable SaaS deployment (on-premise version available)
- Is part of the TriZetto Connected Interoperability Solution

Cognizant®

Compatible cores and custom integrations

For current maintenance clients on the Facets Open Access (5.6 R3 and above) and QNXT QXI (5.5 R4 and above) platforms, the TriZetto Interoperability Adapter without an additional license fee as part of their Maintenance Services. However, these clients will require a license agreement for the Adapter and hosting or professional services costs may be incurred. Hosting costs may include but are not limited to Microsoft Azure, any third-party license obligations, support labor and implementation. The TriZetto Interoperability Adapter will also be delivered with new purchases of the Facets Open Access or the QNXT QXI platform.

Clients with previous versions of the Facets and QNXT platforms may need to upgrade to the latest version to take advantage of all-new capabilities, including the Interoperability Adapter. Otherwise, Cognizant Services can develop custom API feeds and integrate other data sources to enable data standardization and translation.

Data transformation assists interoperability compliance

Real-time data translation streamlines a critical step in the path to delivering interoperable data access. By extending the capabilities of your existing IT infrastructure, you can minimize the budgetary impact of interoperability while making a sound investment in your capabilities.

Using the TriZetto Interoperability Adapter with the other TriZetto Connected Interoperability Solution products—the TriZetto Interoperability Data Hub, the TriZetto Interoperability Privacy and Consent Engine and the TriZetto Interoperability API Gateway—and services, you can accelerate your interoperability initiative, scale capabilities that assist in compliance, and deliver business agility and operational efficiencies.

Contact your account manager to initiate your no-cost TriZetto Interoperability Adapter license.

About Cognizant

Cognizant (Nasdaq-100: CTSH) is one of the world's leading professional services companies, transforming clients' business, operating and technology models for the digital era. Our unique industry-based, consultative approach helps clients envision, build and run more innovative and efficient businesses. Headquartered in the U.S., Cognizant is ranked 194 on the Fortune 500 and is consistently listed among the most admired companies in the world.
